RESEARCH PROFILE

Climate adaptation researcher with an MSc in Climate Studies(Wageningen University & Research) and a background in river and coastal engineering. Experience in climate adaptation and resilience planning, climate-risk and vulnerability assessment, scenario analysis, GIS-based spatial analysis, stakeholder engagement, capacity strengthening and translating research into practical decision-making. At Deltares, co-developed Climate Resilient Development Pathways for Logroño, Spain, through the EU Horizon REACHOUT project, combining climate scenarios, GIS mapping, and Python-based spatial analysis to support the sequencing of resilience actions under different plausible futures. Master's research examined how equity can be integrated into adaptation pathways using a Mekong Delta case study. Currently support regional and global adaptation initiatives at PlanAdapt under the UK–Canada CLARE research programme, through capacity strengthening, partner coordination, knowledge products and monitoring and evaluation. Experienced in participatory and co-creation methods with local communities and government stakeholders in river basin and urban contexts, and in interdisciplinary and international collaboration.

TECHNICAL AND RESEARCH SKILLS

- **Climate adaptation and resilience planning:** Adaptation pathways; climate-resilient development pathways; locally led adaptation; nature-based solutions; water resources management; river and coastal systems.
- **Climate risk and vulnerability:** Climate risk and vulnerability assessment; climate scenario analysis; environmental impact assessment.
- **Stakeholder engagement:** participatory action research; co-creation with local communities and government stakeholders; interdisciplinary and international collaboration.
- **Science–policy translation:** turning research into accessible materials for non-specialists; technical reporting; knowledge products; research communication.
- **Monitoring and project coordination:** monitoring, evaluation and learning; partner coordination; deliverable tracking; reporting workflows.
- **Spatial and quantitative analysis:** QGIS; Python-based spatial data processing; Google Earth Engine; Delft3D FM hydrodynamic modelling; water resources management.
- **Other tools:** Microsoft Office including Excel; Google Workspace; Canva; AI-assisted research and knowledge management tools.

PROFESSIONAL EXPERIENCE & PROJECTS

Research Analyst (Home-Based,Thailand)

PlanAdapt | Berlin, Germany

Internship: August 2025 - November 2025

- Coordinate partner inputs, design and deliver regional and global capacity strengthening and locally led adaptation activities on climate adaptation and resilience.
- Develop knowledge products, outreach content, and communication materials, and contribute to monitoring and evaluating capacity strengthening interventions under [CLARE Capacity Strengthening Hub](#).
- Develop content for social media, and outreach materials; maintain web and LinkedIn communications to engage stakeholders.

Master's Thesis Student and Intern**Jul 2024 – Jul 2025****Deltares | Delft, Netherlands**

- EU Horizon REACHOUT project: co-developed Climate Resilient Development Pathways (CRDP) for Logroño, Spain, integrating climate scenario analysis, GIS mapping and Python-based spatial data processing to sequence resilience actions under different plausible futures.
- MSc thesis: authored Equitable Adaptation Development Pathways (EADP), extending an adaptation pathways framework to integrate equity into adaptation planning, with a case study on the Mekong Delta.

Employee Experience Specialist**Jan 2022 – Sep 2023****Proximity Designs | Yangon, Myanmar**

- Promoted from Associate to Specialist, managed internal programs to foster a value-driven and inclusive work environment for an organization supporting 100,000+ smallholder farmers annually.
- Organized employee experience projects focused on professional development, gender equality, and equity.

Junior Consultant, Rivers & Coasts**Jul 2018 – Feb 2021****Arcadis | Yangon, Myanmar**

- Applied Delft3D FM hydrodynamic modelling and GIS analysis in environmental and water resilience projects in Myanmar.
- Provided technical inputs and junior advisory support in collaboration with Dutch and Myanmar experts.
- Used participatory and co-creation methods with local communities and government stakeholders in river basin and urban contexts.

EDUCATION

M.Sc. in Climate Studies | Wageningen University & Research**Sep 2023 - Jul 2025****Wageningen, Netherlands**

- **Areas of study:** Climate adaptation, governance, economics, policy, water management, and urban resilience.
- **Master's thesis:** The Equitable Adaptation Development Pathways (EADP) Framework [Conducted thesis research at Deltares, integrating equity into adaptation planning through a Mekong Delta case study].
- **Internship:** Climate Resilient Development Pathways for Logroño, Spain, within the EU Horizon REACHOUT project at Deltares.

B.Eng. in River and Coastal Engineering | Myanmar Maritime University**Dec 2013 - Feb 2019****Yangon, Myanmar**

- **Areas of study:** River morphodynamics, hydrology, and environmental impact assessment.
- **Bachelor's thesis:** Analysis of Bank Erosion in Pan Hlaing River at Nyaungdon.
- **Internship:** Bank and Bed Protection of the Ayeyarwady River, Nyaungdon (Myanmar) at Arcadis (Yangon, Myanmar).

SELECTED TECHNICAL TRAINING

Delft3D FM Modelling and Assessment of the Ayeyarwady Delta

Yangon, Myanmar | 2019

Satellite-Based Remote Sensing for Water Professionals in Myanmar — Advanced Hands-On Training, Parts 1 and 2

Yangon, Myanmar | 2019

Young Expert Programme — Water

The Hague, Netherlands | May 2020 – March 2021

AWARDS AND ADDITIONAL PROGRAMMES

Second Prize — Team Award, Nature-based Future Challenge for Bangladesh

Wageningen University & Research | 2024

Full Master's Scholarship

Wageningen University Fellowship Programme (WUFP) and Anne van den Ban Fund (ABF) | 2023

Japan–Asia Youth Exchange Programme in Science — SAKURA Programme

Ehime University, Japan | 2018

Myanmar–Netherlands Water Challenge

Yangon, Myanmar | 2016

LANGUAGES

Burmese: Native | English: Proficient (C1) | Dutch & Japanese (beginner level)

REFEREES

Tanya Huizer

Senior Water Resilience Specialist, Asian Development Bank (ADB)

tanya.huizer@gmail.com

former country director of Arcadis, Myanmar

Maaïke van Aalst

Senior Advisor, Deltares

Maaïke.vanAalst@deltares.nl

MSc thesis supervisor

Dr. Gaby S. Langendijk

Program Developer Climate Resilient Cities, AMS Institute

langendijk.gs@gmail.com

MSc internship supervisor
